ENGINEERING & OPERATIONS SPECIFICATION

NEW SHOP TRICHY — CLAUDE MARKETING SKILL

AI-Powered Marketing Intelligence & Automation Framework

Target Reviewer: Team Lead / Technical Review

Document Version: 1.0 (Production Architecture)

System Type: Specialized Claude Skill

Location Scope: Trichy Franchise, Tamil Nadu

Classification: Internal Project Documentation

Status: Approved for Implementation

---

1. PROJECT OVERVIEW

Project: New Shop Trichy — Claude Marketing Skill

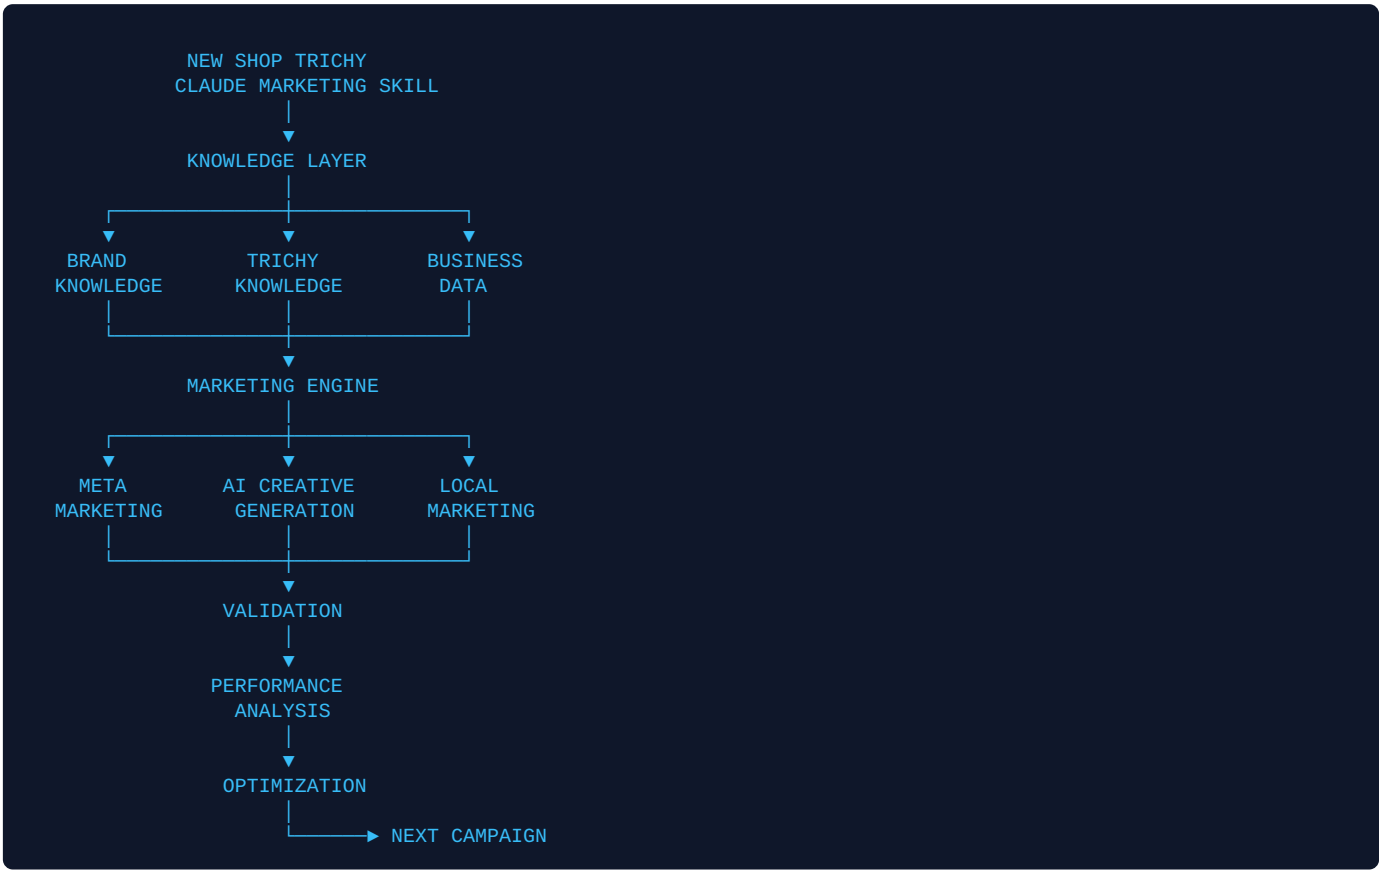

Purpose: Create a specialized Claude Skill acting as a centralized, deterministic marketing intelligence layer for the New Shop Trichy franchise. The framework unifies brand identity, hyper-local geography, advertising execution, localization, and compliance into a repeatable workflow.

Core Unified Capabilities:

- **Official Brand Knowledge:** Brand rules, authorized value propositions, approved visual identity.
- **Trichy Franchise Intel:** Physical location, hours, nearby landmarks, student/commercial catchment zones.
- **Local Audience Profiles:** Tailored targeting for students, tech park workers, travelers, and local families.
- **Catalog & Offer Rules:** Verified SKUs, authorized discounts, festival-specific deals.
- **End-to-End Advertising:** Meta Ads execution, AI prompt generation, copy localization (English/Tamil/Tanglish).
- **Governance & Optimization:** Tri-state safety verification (Green/Yellow/Red) and closed-loop campaign iteration.

Primary Objective: Convert raw business requirements and marketing directives into consistent, localized, brand-safe, and instantly deployable advertising and operational collateral.

2. HIGH-LEVEL ARCHITECTURE

Layer Descriptions:

- **Knowledge Layer:** The foundational truth store containing immutable corporate guidelines, verified franchise specs, and catalog data.
- **Marketing Engine:** Execution pipelines generating ad copy, AI visual prompts, and localized tactical assets across digital channels.
- **Validation Layer:** Automated policy check evaluating claims, pricing, and logos prior to publishing.
- **Performance & Optimization:** Feedback loop analyzing metrics (CTR, ROAS, CPA) to refine future iteration cycles.

3. KNOWLEDGE ARCHITECTURE

```
knowledge/
├── brand/
├── trichy/
├── marketing/
├── creative/
└── analytics/
```

CATEGORY	SUB-DOMAINS INCLUDED	OPERATIONAL PURPOSE
BRAND	Brand identity, Corporate info, Franchise guidelines, Brand voice, Logo protection, Approved claims, Safety limits.	Enforces strict brand adherence, voice consistency, and corporate compliance across all touchpoints.
TRICHY	Store address, Operating hours, Local demographics, Catchment zones (NIT,	Grounds outputs in geographical reality, catering directly to Trichy's urban and student population.

CATEGORY	SUB-DOMAINS INCLUDED	OPERATIONAL PURPOSE
	Thillai Nagar, etc.), Local events, Local SEO.	
MARKETING	Meta Ads framework, Content pillars, Promo calendar, WhatsApp broadcasts, Tamil festival plans, Funnel strategy.	Translates commercial targets into channel-specific media plans and promotional calendars.
CREATIVE	Visual guidelines, AI image prompts, AI video prompts, Product packaging safety, Storyboard specs.	Generates production-ready prompts while preventing AI hallucination of brand logos and physical packaging.
ANALYTICS	Meta Ads analytics, A/B testing standards, UTM attribution models, Approval checklists.	Provides standardized quantitative evaluation frameworks to measure and scale campaign ROI.

4. CORE MODULES

MODULE	MAIN FUNCTION	SYSTEM OUTPUT
Campaign Strategy	Convert business objectives into campaign plans.	Full campaign structure, audience definition, funnel stage, and CTA recommendations.
Meta Marketing	Generate paid Facebook and Instagram ad units.	Ad copy variants, primary headlines, description lines, placement configurations.
Creative Generation	Create structured concepts for visual assets.	Text-to-Image / Video prompts (Midjourney, Runway), 15s Reel storyboards.
Localization	Adapt messaging for regional cultural nuances.	Tri-lingual copy: Pure English, Formal Tamil, and Conversational Tanglish.
Local Marketing	Drive footfall and hyperlocal discovery.	Google Business posts, WhatsApp broadcast updates, Local SEO copy.
Offer Management	Safely structure and communicate promotions.	Verified promo announcements, discount tags, valid terms and conditions.
Analytics	Diagnose advertising performance data.	Actionable optimization insights and diagnostic metrics breakdown.
A/B Testing	Structure controlled multivariate experiments.	Hypothesis matrix, isolated single-variable variations, win criteria.
Governance	Audit generated output against brand truth.	Tri-state clearance status (GREEN / YELLOW / RED).

5. INPUT → PROCESS → OUTPUT PIPELINE

```
INPUT
├── Brand Information
├── Store Information
├── Product Information
├── Offers
├── Target Audience
├── Campaign Objective
└── Performance Data
      │
      ▼
CLAUDE SKILL (Processing Engine)
├── Understand: Parse user prompt, campaign goals, and audience constraints
├── Validate: Check against approved store facts, pricing, and governance rules
├── Localize: Map tone to Trichy demographic (Tanglish for youth, Tamil for family)
├── Strategize: Select optimal funnel stage, creative format, and ad angles
├── Create: Generate headlines, copy, AI prompts, and storyboard scripts
└── Review: Perform final brand safety and compliance checklist verification
      │
      ▼
OUTPUT
├── Meta Ads (Copy, Headlines, Placements)
├── Instagram Content (Feed Posts, Carousels)
├── Reels & Stories (15-30s Audio/Visual scripts)
├── AI Image & Video Prompts (Preserving packaging/logo)
├── WhatsApp & Google Business Content (Broadcasts, Updates)
├── Local SEO Content (Keywords, Trichy location anchors)
└── Performance Recommendations (Scale, Pause, Rework actions)
```

6. CAMPAIGN LIFECYCLE & CLOSED-LOOP FEEDBACK

```
REQUIREMENT ──► OBJECTIVE ──► KNOWLEDGE CHECK ──► AUDIENCE
                                                     │
                                                     ▼
PUBLISH ◄── APPROVAL ◄── VALIDATION ◄── CREATIVE ◄── STRATEGY
   │
   ▼
MEASURE ──► ANALYZE ──► OPTIMIZE ──► [ FEEDS INTO NEXT CAMPAIGN ]
```

Closed-Loop Mechanism: The lifecycle does not terminate at publishing. Performance metrics (CTR, CPC, CPA) are ingested back into the Skill's context to calibrate future ad copy, test variants, and budget allocations.

7. LOCALIZATION ENGINE

> **Core Principle: “Localized, not simply translated.”**
> Literal translation often feels robotic and disconnects from regional sentiments. The Localization Engine adapts idioms, references, and emotional tone specifically for Trichy and Tamil Nadu culture.

DIALECT TIER	TARGET DEMOGRAPHIC & CONTEXT	TONE & STYLE ATTRIBUTES
English	Corporate announcements, tech professionals, general ad reach.	Clean, crisp, modern, professional, premium retail focus.
Tamil	Local families, traditional shoppers, cultural festival campaigns (Pongal, Diwali).	Warm, respectful, emotionally resonant, authentic regional vocabulary.
Tanglish		

DIALECT TIER	TARGET DEMOGRAPHIC & CONTEXT	TONE & STYLE ATTRIBUTES
	College students (NIT, Bishop Heber, St. Joseph's), youth snack runs, social media Reels.	Casual, trendy, high-energy, relatable conversational cadence.

8. META ADS FRAMEWORK

1. Campaign Objectives

Awareness, Reach, Engagement, Traffic, Messages (WhatsApp), Leads, Sales/Conversions, Retargeting.

2. Target Audience Segments

Nearby Residents (within 3-5 km), College Students, Corporate Employees, Families, Travelers/Commuters, Night-Shift Workers.

3. Creative Formats & Placement Strategy

Feed (1:1 / 4:5): High-clarity static offer cards and multi-item carousels.
Reels & Stories (9:16): Fast-paced vertical videos, hook-driven native UGC-style storytelling.
Video Ads: 15-second snack craving hooks, midnight store walkthroughs, and promotional product showcases.

9. AI CREATIVE FRAMEWORK & BRAND PROTECTION

The Skill writes structured text-to-image and text-to-video prompts (Midjourney, Runway, Stable Diffusion) adhering to strict brand asset safety boundaries:

PROMPT CAPABILITIES	BRAND PROTECTION HARD BOUNDARIES
• Hyper-realistic convenience store interior/exterior lighting. • High-energy student snack runs & lifestyle visuals. • Seasonal Trichy festival backgrounds & celebrations. • Dynamic 15-second short-form Reel visual pacing.	• **Preserve Official Logo:** No AI distortions or color changes. • **Preserve Product Identity:** Real SKUs and packaging only. • **Zero Hallucination:** Never invent fake prices, discounts, or tags. • **Asset Integrity:** Do not redesign registered brand marks.

10. BRAND GOVERNANCE & VALIDATION LAYER

Every generated asset is evaluated against three governance thresholds prior to deployment:

STATUS LEVEL	EVALUATION CRITERIA	OPERATIONAL ACTION
GREEN — READY	Content contains 100% verified facts, approved pricing, and adheres completely to brand safety rules.	Directly cleared for publishing.
YELLOW — CONFIRM	Requires human verification of specific variable data: current stock, prices, promotional dates, operating hours, or delivery radius.	Flag for Franchise Owner / Store Manager sign-off before launch.
RED — REJECT	Contains unverified claims, fabricated reviews/ testimonials, fake discounts, or unauthorized trademark mutations.	Instantly discarded and blocked from publishing.

11. PERFORMANCE & ANALYTICS DECISION FRAMEWORK

STAGE	KEY METRICS TRACKED	DECISION FRAMEWORK ACTION
Awareness	Reach, Impressions, CPM, Frequency	

STAGE	KEY METRICS TRACKED	DECISION FRAMEWORK ACTION
		SCALE: High CTR, low CPA, profitable ROAS → Increase budget by 20%.
Engagement	Engagement Rate, 3-sec Video Views, CPE	**KEEP:** Steady conversion and healthy benchmark metrics → Maintain spend.
Traffic	CTR (Link Click-Through Rate), CPC, Landing Page Views	**TEST:** Promising engagement but uncertain ROAS → Spin out A/B variations.
Conversion	Store Visits, WhatsApp Leads, Purchases, CPA, ROAS	**REWORK / PAUSE:** High CPC, low CTR (<0.8%), or ad fatigue → Refresh hook or kill.

12. A/B TESTING & 13. UTM ATTRIBUTION

A/B Testing Methodology

Core Rule: Change exactly *one variable* at a time (Hook, Creative, Audience, Language, CTA, or Offer) to ensure clean causal attribution.

Example: Test identical visual creative with a Tanglish vs. Pure English hook to isolate cultural engagement lift.

Standardized UTM Architecture

Enforces uniform query parameter tagging across all links:

```
utm_source=meta
utm_medium=paid_social
utm_campaign=newshop_trichy_launch
utm_content=reel_01
```

15. TYPICAL USE CASE: END-TO-END EXECUTION

WORKFLOW STEP	STEP EXECUTION DETAILS
1. User Input	*“Create a Meta campaign for New Shop Trichy targeting college students for late-night snacks.”*
2. Process Logic	**Objective:** Traffic / Store Visits • **Audience:** College Students (NIT, Bishop Heber, 18-24) **Language:** Tanglish • **Format:** 15-second Fast-Cut Reel • **Message:** Midnight Munchies • **CTA:** Visit New Shop Trichy
3. Generated Output	**Ad Headline:** “Late-night assignment tension-ah? Midnight snacks ready at New Shop Trichy! 🌙🍟”

WORKFLOW STEP	STEP EXECUTION DETAILS
	Reel Storyboard: [0-3s Hook: Student staring at clock at 11:45 PM] → [4-10s: Quick cuts of chilled beverages, hot snacks, and instant noodles] → [11-15s: Friendly store exterior with address callout]. **AI Video Prompt:** *"Cinematic dynamic shot of vibrant convenience store aisle, modern warm lighting, aesthetic snack displays, high energy, 4k photorealistic --no blurry packaging."* **Governance:** GREEN — READY (Hours and snack categories verified against Trichy store profile).

16. END-TO-END SYSTEM FLOW

17. BUSINESS VALUE

- **Consistent Brand Communication:** Eliminates off-brand rogue marketing while maintaining 100% franchise alignment.
- **10x Faster Campaign Production:** Reduces campaign turn-around from days to minutes.
- **Hyper-Local Trichy Relevance:** Replaces generic corporate speak with authentic Tamil/Tanglish cultural hooks.
- **Hallucination-Proof AI Workflows:** Preserves actual product packaging and store marks with strict guardrails.
- **Enterprise Scalability:** Serves as a modular, plug-and-play blueprint for rapid onboarding of future New Shop locations.

18. IMPORTANT IMPLEMENTATION PRINCIPLES

1. Single Source of Truth: Corporate guidelines govern brand claims; local data governs store capabilities.

2. No Capability Assumptions: Corporate features (e.g., 24/7 delivery) must not be assumed unless verified for Trichy.

3. Zero Hallucination Policy: Never invent prices, offers, stock, reviews, or operational timings.

4. Asset Integrity: AI tools create atmosphere and lifestyle; official logos and products remain unaltered.

5. True Cultural Localization: Adapt idioms and tone rather than performing direct literal translation.

6. Continuous Data Feedback: Campaign metrics feed back into subsequent creative prompt generations.

7. Knowledge Separation: Static knowledge bases are strictly partitioned from transient campaign templates.

8. Scalable Modular Design: All prompts and directory structures are franchise-agnostic at the root.
